Foreword: Unlocking Opportunities in African Fintech

It is with great pleasure to present you the 2025 Africa Tech Summit Deal Book. These pages offer an in-depth look at the boundless opportunities within Africa's fintech sector, showcasing the transformative innovations driving growth and reshaping the continent's fintech landscape.

The Africa Tech Summit Deal Book provides insights into the groundbreaking developments and opportunities that define Africa's fintech sector. With over USD$20 billion raised by African tech companies in the past decade-of which fintech has claimed the largest share, the transformative power of venture capital in scaling the ecosystem remains undeniable. Despite global economic headwinds and shifting funding trends, Absa remains steadfast in our commitment to empowering clients as they navigate this dynamic and promising sector.

At Absa, we pride ourselves on identifying and delivering fintech-focused advisory solutions. Whether through facilitating mergers and acquisitions, supporting capital raising across public and private markets, or driving innovative conversations around balance sheet lending and strategic joint ventures, we are deeply invested in fostering growth across the fintech landscape. Our comprehensive approach ensures that we remain trusted partners to our clients as they capitalize on the immense potential of Africa's fintech ecosystem.

In comparing African fintech to the rest of the world, we identify unique challenges and trends. Carve outs and the growing demand for local currency funding are distinctive themes that we expect to continue gaining traction as incumbent institutions seek to unlock value from payment assets, and new age fintech companies seek to localize their funding. The rise of instant payments and a focus on domestic and cross-border payments infrastructure, embedding financial services into legacy value chains, fintech-led M&A, and exit pathways for private-funded assets, are all strong themes that we expect to continue shaping discourse on the sector's future.

As you explore the Africa Tech Summit Deal Book, you will uncover not only transactions but also opportunities for collaboration, innovation, and growth. Absa, as a leading Pan-African banking group, is proud to play a pivotal role in unlocking value, fostering connections, and driving the evolution of fintech across Africa.

I invite you to explore the opportunities within these pages, reimagine the possibilities, and join us in shaping the future of fintech on the African continent.

Contact Information:

Johannes Schwegler | Founder and Executive Director

E: johannes.schwegler@treeo.one
W: www.treeo.one/en
L: www.linkedin.com/company/treeo-one/

Short Description

At TREEO we believe that real climate impact can only be sustainable in the long term when it also has a transparent, positive socio-economic impact. With the TREEO technology, growers collect traceable, monitoring data from every single tree. This creates the necessary trust and transparency companies need from tree growers to commercialize carbon sinks. Additionally, this empowers local communities to regenerate the earth while generating new revenue.

TREEO enables farmers to generate high-quality carbon sinks through accurate monitoring of sequestered CO2. Conventional methods have resulted in inaccuracies and mistrust, but our single-tree monitoring approach and our technology - using species-specific allometric formulas, image processing, and machine learning - assure the highest level of precision. This way we empower tree growers to supply tCO2e at scale. We then provide the verified data directly to our balancers who can prove their climate contributions.

Pixii Motors

Industry: e-Mobility / EV | Tunisia

Years in Operation: 3+ years

Female founders: Yes

No. Employees: 5-25

How much funding are you looking to raise in the next year?

$1M

Bootstrapped

Short Description

Seedhack bridges the gap between African startups and Series A through hands-on technical execution. Built by operators who've navigated the journey from zero to exit multiple times, we provide the infrastructure, engineering muscle, and operational expertise that early-stage companies need to scale. Our battle-tested team has raised $5M+ in venture capital, built products serving 50K+ customers, and delivered successful exits across Kenya, Nigeria, and South Africa. We don't just advise - we roll up our sleeves and build alongside founders, turning promising ideas into scalable, investment-ready companies. Because in Africa's challenging tech ecosystem, capital alone isn't enough - execution is everything.
